***Detailed Action***

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-10 and 15-24 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Claims 1-16 are missing critical or essential elements necessary for the invention to function. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). In particular, the Declaratory evidence provided on 6-7-2002 demonstrates that the prior art fails to meet the claimed property recitations despite meeting the claimed chemical and structural limitations. Applicant describes the use of a particular polymeric binder that is crucial to the success of attaining the desired durability and effectiveness of the specific coating (Specification, pp. 12 lines 17-19). Yet, no binder (claim 15), much less a binder of any particular variety is required by the claims. The specification does not enable one skilled in the art to practice the invention without undue experimentation to develop techniques and means to achieve the claimed properties from the chemistry and structure claimed instantly.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-10 and 15-24 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1764

5. Claims 1-10 and 15-24 are indefinite because they fail to set forth the composition or structure of the claimed "finish" and only claim properties of wash durability. Claims that merely set forth physical characteristics desired in an article, and not setting forth specific compositions which would meet such characteristics are invalid as vague, indefinite, and functional since they cover any conceivable combination of ingredients either presently existing or which might be discovered in the future and result in claiming a composition by desired functional characteristics rather than through claiming the structure of said composition. *Ex parte Slob* (PO BdApp) 157 USPQ 172. Since the Specification seems to require elements and characteristics not found in the instant claims, it is not felt that the instant claims can be said "to particularly point out" Applicant's invention as required by the statute. Further, the features and/or characteristics necessary to fulfill the functional desires of the invention are not realized in the instant claim language.
